The 2020 Census is underway, and we want every Marylander to have their voice heard.

The Census is conducted every ten years and helps shape important decisions for the decade to come. Here's a few things you need to know about the 2020 Census:

- It's important, easy, and safe – and only takes about 10 minutes to do.
- You can complete it online, by phone, or by mail.
- Your responses will influence federal funding and government services.

As our communities are being changed by COVID-19, the importance of the Census becomes even more clear. Decisions about critical health care services are informed through this process – including the future allocation of vaccines and funding of emergency services.

You can opt-in to receive ongoing updates for Marylanders about the 2020 Census and COVID-19, how your responses are used to help your community, and how you can help others learn more.
