

Sick Leave Employee Donation System (SLEDS)

The Sick Leave Employee Donation System (SLEDS) was utilized from 2011 through 2012. Days were donated (no more than 5 at a time) to staff members who were out due to illness, childbirth, surgery, etc. and didn't have enough sick leave to carry them until their return to their position. Donations could come from any staff member and as long as it was maximized at 5 days per contribution, I believe you could contribute to the same person multiple times if needed.
